

Public notice

Planned power supply interruption

In order to maintain the best possible service it is necessary to interrupt your power supply to carry out maintenance activities.

Date of interruption: **02/07/2017**

Time of outage: 11.30pm to 5.00am

Planned time of resumption: **5.00am**

Areas affected: **All of Flinders Island**

The interruption will allow the following work to be undertaken: **Maintenance of Power Station Assets & Maintenance of Distribution Lines**

**Timing is subject to crews being needed elsewhere in an emergency or unsafe condition created by adverse weather. If the interruption is delayed it may be held the following day.*

Important facts to be aware of:

- Do not carry out private electrical work during the interruption.
- We recommend unplugging electrical equipment during the interruption or turning off your main switch at the switchboard.
- To avoid food spoiling, keep your fridge/freezer door closed at all times if possible during the interruption.

Some helpful tips:

- Fill thermoses with hot water for drinks.
- Use portable gas appliances if you have them.
- If you rely on an electric pump, fill buckets of water for toilet flushing.
- If you turned your mains switch off, remember to turn it back on.
- Electrically operated roller doors will not operate during the outage.

For further information please call the Flinders Island Distribution Office on (03) 63 592068

For all other power outages, faults or emergencies please call 13 2004
